# Joget®DX

ACCELERATE YOUR DIGITAL TRANSFORMATION

Easily Build, Run and Maintain Apps
@ The Speed of Thought With Joget DX

Open Source + No-Code/Low-Code + Workflow

Visually Build Apps and Automate Processes. Anytime, Anywhere, Anyone.

Joget DX is an open source no-code/low-code application platform that combines the best of Rapid Application Development, Business Process Automation and Workflow Management. Joget empowers business users, non-coders or coders with a single platform to easily build, deliver, monitor and maintain enterprise applications.
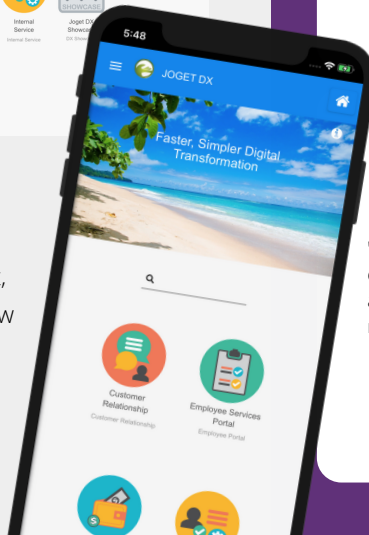

Gartner peerinsights™

"I Dreamed Of It And Joget Did It !"

5.0 ★★★★★

"It was the only one where I could download, install and create my first app in just 2 hours directly on my Workstation (for testing purpose)!! Just amazing!! Without typing any piece of code I was able to create an app to automate a process which was done previously by email and excel file!!"

IT Manager
Industry: Finance
Role: Enterprise Architecture and Technology Innovation
Firm Size: 30B + USD

"Very Easy And Quick Implementation."

5.0 ★★★★★

"We used the Joget product for automating the catalog management and other workflow requirement. Joget has tons of feature to spin the application in matter of hours. There is no code involved. I highly recommend for any enterprise. "

More Insights @ Gartner.com

www.joget.com

SIMPLE

EASY TO USE

- Supports all kinds of complete end-to-end applications, not limited to process centric or data centric use cases.
- Functionality for enterprise apps ready out of the box i.e. forms, lists, UI, workflow processes, user security and integration.
- Powerful plugin architecture and APIs allow developers to extend functionality and integrate with other systems.
- Download ready-made apps and plugins from the Joget Marketplace.

FLEXIBLE

CUSTOMIZE TO YOUR NEEDS

- Web-based visual approach empowers non-coders to build and maintain apps.
- Time to market is greatly reduced, from months to weeks, days, or even minutes for working prototypes.
- Ease of long-term maintenance & reduced operational cost.
- Just a web browser is needed to build and maintain apps, anytime, anywhere.
- Build once, apps are mobile and cloud ready for desktops, tablets and phones.
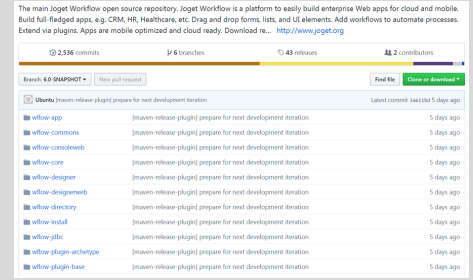

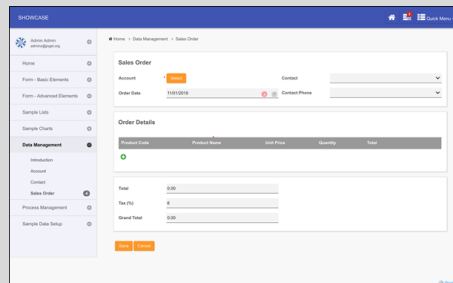

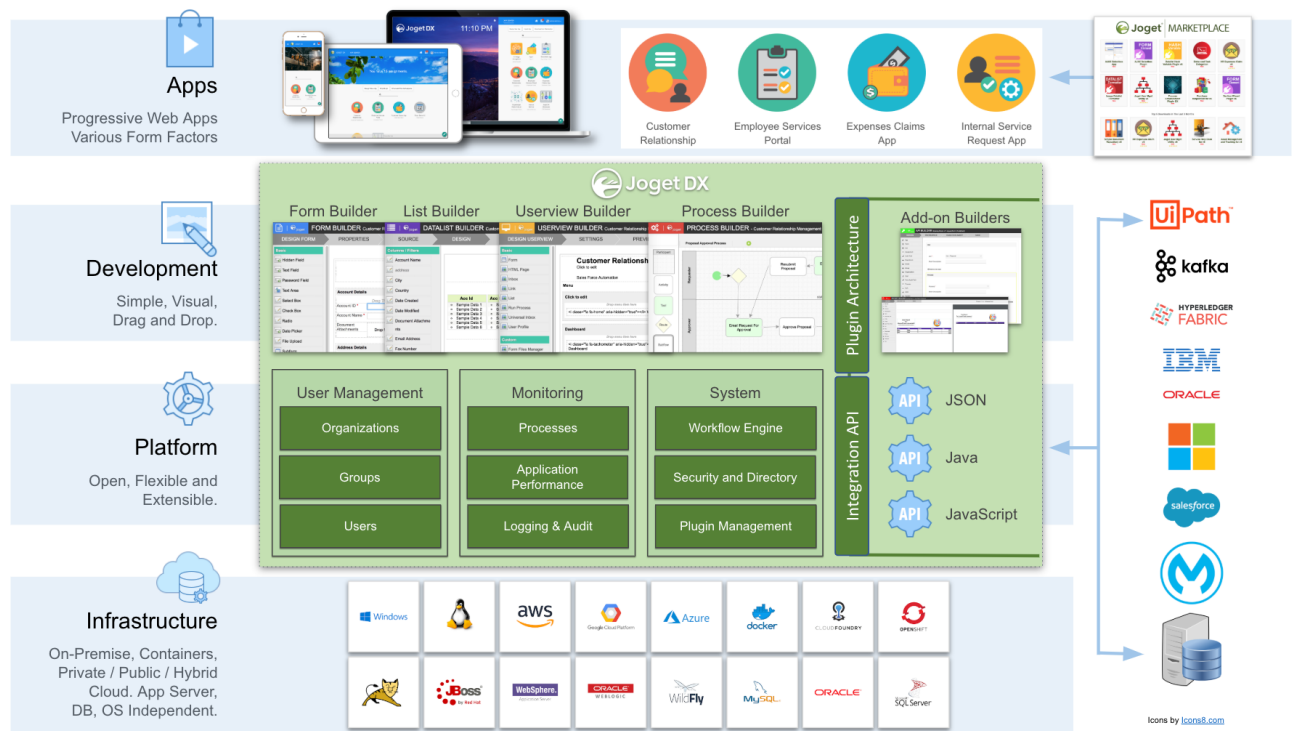

OPEN

COMMUNITY AROUND IT

- The core platform is open source with associated benefits in cost, freedom and security.
- Fits in your environment: on-premise, in the public or private cloud.
- Runs on a multitude of operating systems, databases and application servers to fit your infrastructure.
- Different editions to cater for different feature and affordability needs: Fortune 500 enterprises, government, mid-market companies, small businesses or departments.
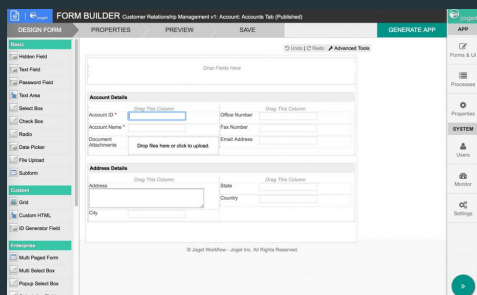

ARCHITECTURE

Apps — Progressive Web Apps Various Form Factors

Development — Simple, Visual, Drag and Drop.

Platform — Open, Flexible and Extensible.

Infrastructure — On-Premise, Containers, Private / Public / Hybrid Cloud. App Server, DB, OS Independent.
